

We are trying to communicate with your children, tickle their curiosity, kindle their interest and encourage them to develop their skills, all with a background of positivity and ambition to realize their dreams.

A lateral development program, it is not our intention to disrupt their school work or make them feel uncomfortable with the series of thoughts and perspectives that they may be exposed to.

We are creating a nurturing, inclusive atmosphere where children can safely explore the wonderful world of art and creative expression, develop confidence and an interest in their activities.

Drawing them out of syllabus, we will encourage their thought and application of knowledge, backed with a variety of emotions and reasons to do things.

With Kind Regards,  
K Karthik
